ABOUT US

Hidden System

Established in 2017, specializing in the supply, installation, and maintenance of advanced security and automation solutions. Our services include **CCTV Surveillance Systems, Fingerprint and Facial Recognition Attendance Systems, Smart Home Technologies, Fiber Optics and Network Cabling, Electronic Equipment Supply**, and a wide range of other security solutions.

Our consistent commitment to quality and timely service has driven steady growth since our inception. Today, we are a trusted name in the industry, delivering cutting-edge security systems powered by the latest technologies and innovative methods. We value strong partnerships with our clients and take pride in our highly professional, experienced team dedicated to excellence in every project.

Expansion to Saudi Arabia - GlanceTechX

As part of our strategic growth and commitment to delivering world-class security solutions, GlanceTechX was established as our branch in Saudi Arabia. GlanceTechX focuses on providing advanced services in **CCTV Systems, Cybersecurity, Software Development, Automation, and Low-Voltage Systems**.

Leveraging cutting-edge technologies, the team at GlanceTechX specializes in **IoT Integration, Access Control, and AI-powered Security Monitoring**. Our mission is to deliver comprehensive, smart security solutions tailored to the needs of both businesses and individuals across the Kingdom of Saudi Arabia.

OUR MISSION

To become the leading provider and integrator of smart security systems by offering innovative, high-quality solutions at competitive prices. We aim to help our clients reduce operational costs while ensuring peace of mind through the deployment of cutting-edge, reliable security technologies.

OUR FOCUS:

We are committed to delivering high-quality services powered by emerging technologies. Our expert team stays ahead of industry trends, integrating AI-driven security, cloud-based monitoring, and IoT automation into tailored solutions. By embracing innovation, we ensure our clients benefit from smarter, more secure, and future-ready systems. We specialize in:

- **AI-Powered Video Surveillance** for real-time threat detection and anomaly recognition.
- **Cloud-Integrated Access Control** for seamless security management.
- **IoT-Enabled Smart Home & Building Automation** for energy efficiency and convenience.
- **Interactive Smart Education Systems** are designed to revolutionize modern learning environments.

PRODUCTS AND SERVICES

We offer top-quality products integrated with the latest technologies. Our team of experts excels in planning, designing, and implementing end-to-end smart security solutions with precision and efficiency.

Our products and services include:

- Digital and Smart CCTV Systems
- Access Control System
- Smart Home Automation and Intercom Solutions
- Public Address & Conference System
- Smart Educations and Interactive Panels
- Fire Alarm Systems
- Building Management System
- GPS Tracking System
- IT and Networking Solutions
- Electrical Wiring Services

NOTABLE PROJECTS

Food Nation(Riyadh) - GPS Vehicle tracking devices

Installed GPS vehicle tracking devices for Food Nation Company in Riyadh to monitor the fleet in real time and ensure safe and timely delivery.

Smart Education System - Yenepoya Medical College (University)

(Featured in [Hikvision Global Success Story](#)) We successfully implemented a comprehensive smart education system at Yenepoya Institute, integrating over **2,000 CCTV cameras**, **200+ Smart TVs**, and a **state-of-the-art LED wall**. This landmark project has been recognized by Hikvision and featured on their global success stories website: [Click to Read More](#)

Fiza Nexus Mall, Mangalore

A large-scale security deployment featuring **280 high-resolution CCTV cameras**, providing comprehensive surveillance and enhanced security for one of Mangalore's premier shopping destinations.

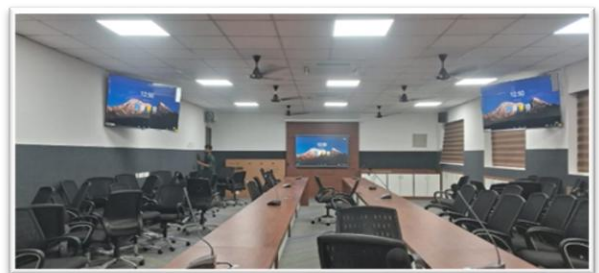

Kanachur Education System

Installed **more than 150 CCTV cameras** to strengthen security and safety across the educational campus, creating a secure environment for both students and faculty.

DIGITAL AND SMART CCTV SYSTEMS

We pride ourselves on being at the forefront of technology, offering solutions ranging from **Full HD and Smart IP network-based CCTV systems** to **advanced AI video analytics and ANPR** (Automatic Number Plate Recognition) solutions. Additionally, we provide mobile device viewing and control of your installed cameras via **ISP connectivity for seamless remote access**.

Our Products includes:

1. Dome Camera
2. IR Dome Camera
3. Bullet Camera
4. Panoramic Camera
5. NVR, MDVR, DVR

ACCESS CONTROL SYSTEMS

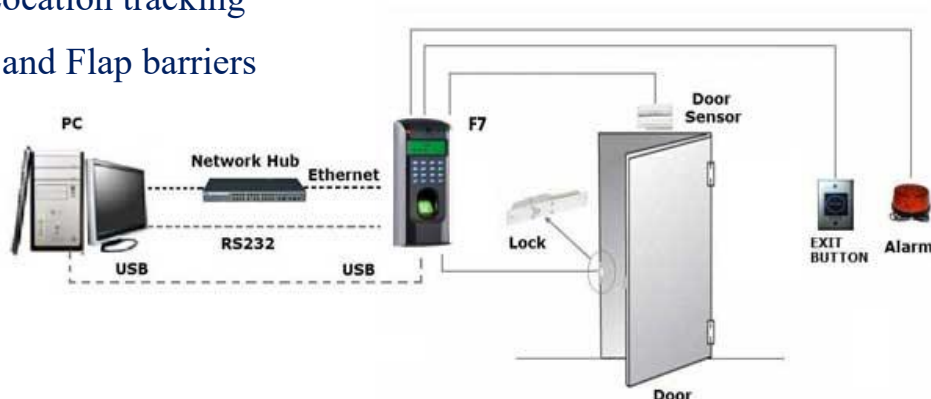

Effective access control goes beyond restricting entry to high-security areas — it also ensures that employees and visitors can access the right spaces at the right times with minimal friction. Implementing a reliable access control system is one of the most dependable ways to protect your business, property, and sensitive information.

Our Solution Includes:

1. Fingerprint Access System
2. Time and Attendance System
3. Face Recognition System
4. Door Access Solutions
5. Parking System Solution
6. Mobile Access Solutions
7. Intruder Alarm System
8. GPS Location tracking
9. Boom and Flap barriers

Flap and boom Barrier

SMART HOME AUTOMATION AND INTERCOM

Smart Home Automation has become increasingly intelligent, allowing seamless control through smartphones, tablets, keypads, or touch panels. With a single tap, you can adjust your air conditioning, play your favorite music in any room, or set the lighting and shades to create the perfect ambiance for any occasion.

Visitor identification is a crucial component of a complete door entry solution. We provide and install **high-quality video and audio intercom systems** using 2-wire or IP network infrastructure. Our expert consultants guide you through the available options and ensure installation tailored precisely to your requirements.

PUBLIC ADDRESS & CONFERENCE SYSTEM

A Public Address (PA) system is a vital component for buildings, schools, and offices. It serves key functions such as public announcements, background music, and emergency evacuation alerts. In addition, conference systems are specialized audio setups designed to facilitate clear and efficient communication among participants, regardless of room size or event scale.

We provide high-quality public address and voice evacuation systems that are essential for meeting modern security and safety requirements. Our solutions feature trusted technologies from leading providers such as **BOSCH**, **Logitech**, and other industry-renowned brands.

Smart Educations and Interactive Panels

Interactive Flat Panels are more popular and widely used than ever in today's digital landscape. We offer flexible, multi-functional solutions featuring 4K Ultra HD displays, precise onscreen writing, and wireless screen sharing capabilities. Sourced from leading vendors, our panels support seamless collaboration for both remote and on-site teams.

Our products

1. Smart interactive panels
 - a. 4k Ultra HD
 - b. Latest android OS
 - c. Smooth and natural writing experience
 - d. Antibacterial
 - e. Wireless screensharing
2. Smart TV
3. Monitors

LOGIC

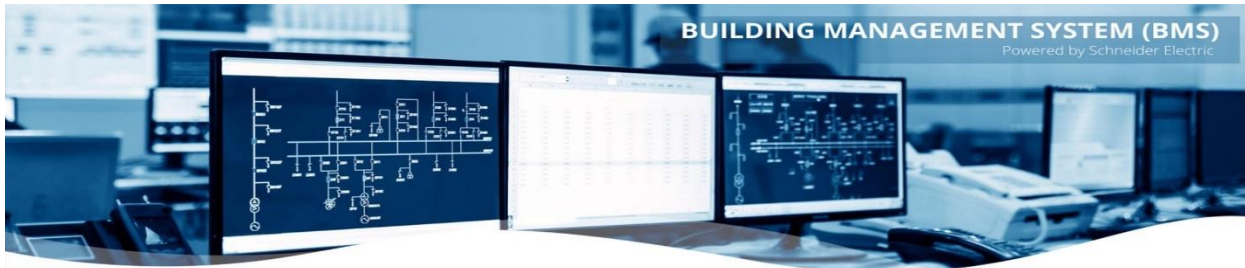

- Quad-core CPU
- 4GB RAM
- 32GB ROM

Dual OS

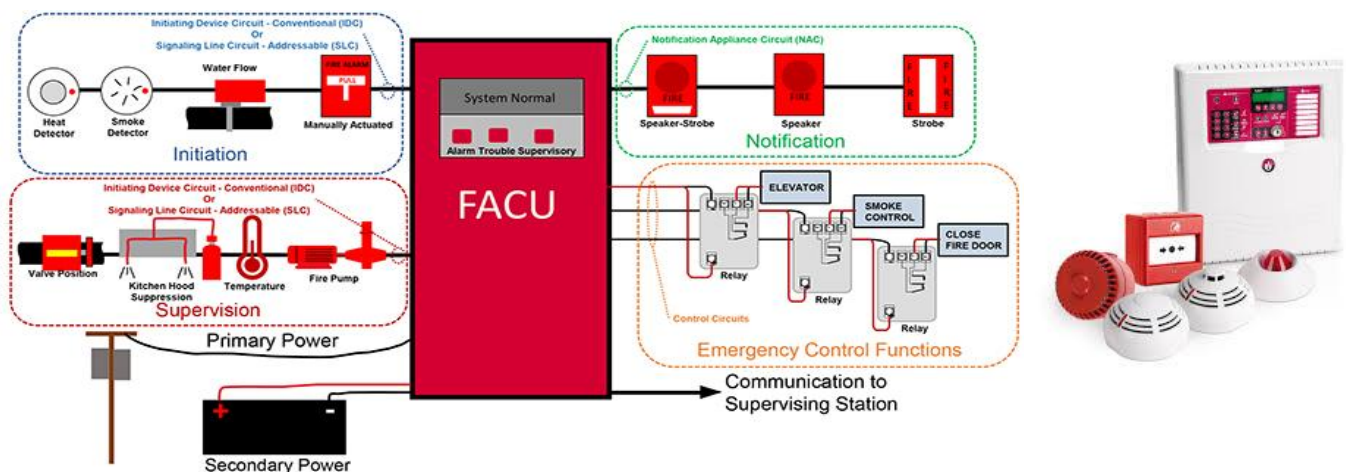

- Android 11
- Optional Windows OS (with OPS)

BUILDING MANAGEMENT AND FIRE ALARM SYSTEM

Building Management Systems (BMS) are intelligent, microprocessor-based controller networks designed to monitor and manage a building's technical systems and services. These include air conditioning, ventilation, lighting, and hydraulic systems, ensuring efficient and automated operation for enhanced comfort, safety, and energy management.

We install advanced and reliable fire alarm systems for both residential and commercial properties, using the latest technologies available in the market. Before project initiation, we present multiple design options tailored to the project's size, aligned with both the client's operational requirements and the risk assessment conducted by our expert engineers.

IT AND NETWORKING SOLUTIONS

Our expert staff bring extensive experience in networking and cabling across a wide range of large-scale projects. We provide end-to-end solutions including data and voice cabling, network installation, structured cabling, and ongoing maintenance. Our design and installation specialists combine cutting-edge technology with modern work ethics and skilled craftsmanship to deliver reliable and future-ready infrastructure.

Our Services include:

- IP & HYBRID PABX
- STRUCTURED CABLING SYSTEM
- WIRELESS NETWORKING & HOTSPOT
- LAN and Wide Area Network

ELECTRICAL WIRING SERVICES

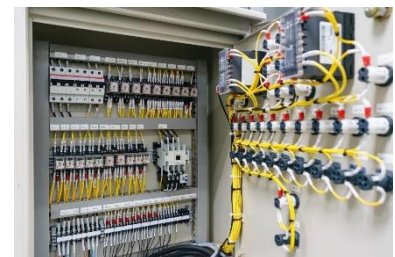

As a trusted electrical wiring contractor in Mangalore, we specialize in providing reliable and efficient wiring solutions. Our team ensures that every system is designed to deliver the right amount of power for commercial spaces such as stores, offices, and factories, supporting continuous operations without the risk of overload.

We begin by analyzing and estimating power demands, followed by detailed planning and system design. Once the electrical wiring installation is complete, we carry out thorough testing and commissioning to ensure safety, reliability, and optimal performance.

Our Services include:

- Whole Building Wiring
- Roughing Installation
- Panel Board Installation
- Circuit Wiring
- Electrical Outlet Wiring
- Remodeling or Upgrade of System
